mooreVIEW — ALF / Living Campus Business Plan

Institutional MEP · 60 campuses · \$110/asset · 55% net profit · Phase 1 Cloud SaaS · 2026

Document version: 1.0 · 2026-08-09

A company powered by The Purple Standard · purple-standard.com

Executive summary

mooreVIEW **Living Campus** targets **multi-site ALF / assisted-living operators** — facilities/MEP monitoring (HVAC, kitchen cold, generator, DHW, leaks, pool/mechanical) with **MVP Suite on-prem** (full ~4,000 tags/campus) and **Phase 1 Cloud SaaS** for portfolio fleet view via **site-agent rollup sync**.

Metric	Year 1	Year 2	Year 3
New campuses	12	24	24
Cumulative campuses	12	36	60
Total revenue	~\$1.09M	~\$3.78M	~\$7.26M
Total cost (45%)	~\$490K	~\$1.70M	~\$3.27M
Net profit (55%)	~\$599K	~\$2.08M	~\$3.99M
End-of-year renewal ARR	~\$1.74M	~\$5.23M	~\$8.71M

Customer pricing (planning default): \$110 / monitored asset / month · ~110 billable assets / standard campus → \$12,100 / campus / month recurring. **One-time commissioning: \$110 × 110 assets = \$12,100** (aligns with Pricing Guide **standard campus** \$12K tier).

Target margin: 55% net profit after install COGS, cloud/cellular, support, sales, and **7% overhead** (Y2+ on total revenue). ALF is **high ACV, low cloud-centrality** — net margin is driven by renewal scale, not droplet cost.

System impact @ 60 campuses: 240,000 on-prem tags (edge) · **~36,000 cloud rollup tags** · **60 site-agent MQTT sessions** · Phase 1 stack **fits with rollup sync** (`MOOREVIEW_MAX_TAGS=65536` , SaaS step to **8 GB**). **Do not** full-mirror 4,000 tags/campus into one SaaS tenant.

Part 1 — Market & product

Scope

Layer	Role
Edge (each campus)	MVP Suite PC — full Studio, ~4,000 tags, cameras, 13 mo local historian, CMMS evidence

Cloud (portfolio)	Phase 1 SaaS :3100 — org login, site agent , fleet map, rollup alarms, compliance export
Project	assisted-living / Living Campus .est

Buyer

Buyer	Outcome
Regional ALF operator (5–60 campuses)	One fleet tenant; survey-ready MEP evidence
FM / integrator partner	Portable .est ; multi-campus Parc
Portfolio owner (PE-backed senior living)	Proactive CMMS across assets; BMS coexistence

vs stacked point solutions

Approach	Typical campus spend	mooreVIEW
CMMS + HVAC IoT + kitchen logger + leak	\$14K – \$30K / yr	~ \$145K yr-1 then ~ \$145K/yr renewal @ 110 assets × \$110
mooreVIEW list (standard campus MSRP)	—	~ \$22K yr-1 list (\$833/mo) — this plan uses asset-based enterprise contract

Enterprise portfolio pricing at **\$110/asset/mo** reflects full-campus template (leak, cold, gen, comfort, mechanical) vs entry MSRP band.

Part 2 — Pricing model (\$110 / asset)

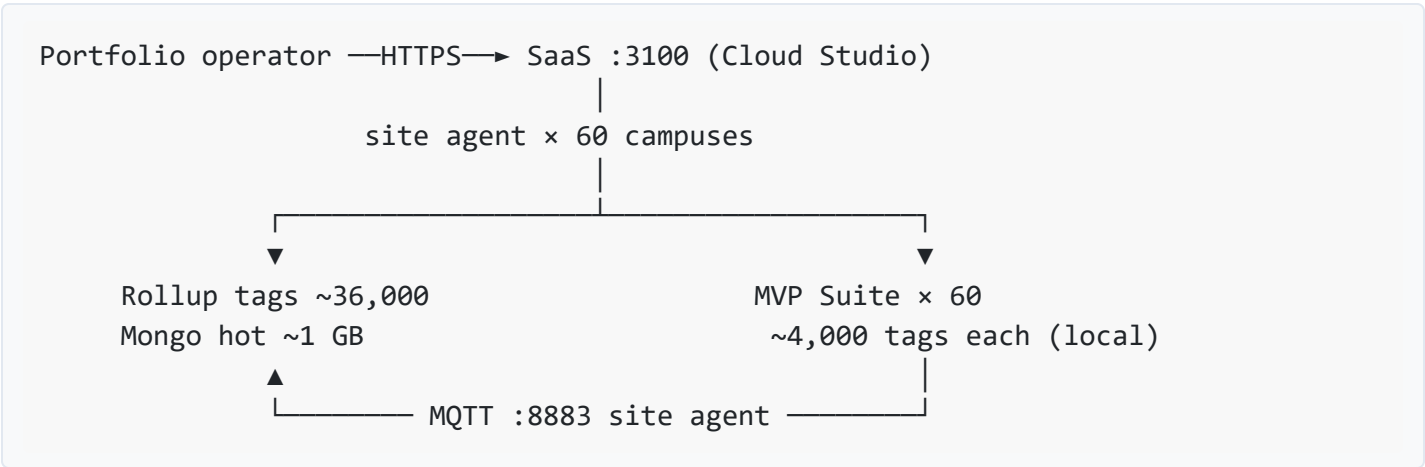

Definitions

Term	Value	Notes
Billable asset	Customer-facing monitored point	HVAC zone, leak circuit, walk-in, gen, DHW, pool pump, etc.
Assets / campus (avg)	~110	Standard 2–3 building campus; scales with bed count
Tags / campus (technical)	~4,000	Full .est template on MVP Suite — unlimited within template
Customer rate	\$110 / asset / mo	Contract line item
Campus recurring	\$12,100 / mo	110 × \$110
Campus one-time	\$12,100	\$110 × 110 assets at commissioning

Campus profile mix (60-site fleet)

Profile	Share	Assets	Recurring/mo	One-time
Small (1 bldg, ≤80 beds)	25%	~75	\$8,250	\$8,250
Standard (2–3 bldg)	55%	~110	\$12,100	\$12,100
Large (4+ bldg)	20%	~155	\$17,050	\$17,050
Fleet weighted avg	100%	~110	~\$12,100	~\$12,100

Part 3 — Phase 1 Cloud SaaS & deployment

Host	ALF @ 60 campuses
SaaS droplet	8 GB (step-up from 4 GB at ~12 campuses)
MQTT droplet	Phase 1 2 GB — 60 connections (headroom >>)
Mongo hot	15 GB base tier sufficient (rollup historian)
Archive	+50 – 100 GB volume (~\$5 – \$10/mo)
Sync model	B — rollup + site agent (~600 cloud pens/campus)

Detail: `MooreVIEW-Infrastructure-Projections.md` Part 10 · `Phase1-SaaS-Architecture-Costs.md`

Part 4 — Financial model (60 campuses / 3 years)

Ramp

12 campuses Y1 · +24 Y2 · +24 Y3 = 60 cumulative. (~1/month Y1, ~2/month Y2–Y3). Equivalent to **3/month for 20 months** then hold at 60.

Revenue

Metric	Year 1	Year 2	Year 3
New campuses	12	24	24
Cumulative (EOY)	12	36	60
One-time (\$12,100 × new)	\$145K	\$290K	\$290K
Renewal (ramped campus-months)	\$944K	\$3.48M	\$6.97M
Total revenue	~\$1.09M	~\$3.78M	~\$7.26M
Renewal ARR (EOY run-rate)	~\$1.74M	~\$5.23M	~\$8.71M

Y1 renewal: 78 campus-months (1+2+...+12) × \$12,100. Y2: 12 full-year + 24 half-year avg. Y3: 36 full-year + 24 half-year avg.

Cost structure (45% of revenue → 55% net)

Cost line	Y1	Y2	Y3	Y3 % rev
Install hardware COGS (~36% of one-time)	\$52K	\$105K	\$105K	1.4%
Install labor & commissioning	\$72K	\$144K	\$144K	2.0%
Cloud + cellular (Phase 1 + site SIM)	\$4K	\$8K	\$15K	0.2%
Overhead (7% of revenue, Y2+ policy)	\$30K+	\$265K	\$508K	7.0%
Customer success & L2 support	\$120K	\$420K	\$800K	11.0%
Sales & partner commission (~8%)	\$87K	\$302K	\$581K	8.0%
Platform / R&D allocation (~5%)	\$55K	\$189K	\$363K	5.0%
Warranty & spares	\$20K	\$45K	\$60K	0.8%
G&A (remainder)	\$50K	\$120K	\$200K	2.8%
Total cost	~\$490K	~\$1.70M	~\$3.27M	45%
Net profit (55%)	~\$599K	~\$2.08M	~\$3.99M	55%

†Y1 OH: **\$3/device/mo** on monitored field assets where applicable + partial 7% — blended **~\$30K** on lower Y1 revenue base (see Wastewater Business Plan OH policy).

Per-campus unit economics (Y3 steady state)

	Per campus / mo	Per campus / yr
Revenue (110 × \$110)	\$12,100	\$145,200
Total cost (45%)	\$5,445	\$65,340
Net profit (55%)	\$6,655	\$79,860

Cost component	Per campus / mo
Cloud + cell (allocated)	~\$21
Support & success	~\$1,333
Sales commission	~\$968
OH (7%)	~\$847
Install COGS (amortized/new-site blend)	~\$200
Platform / G&A	~\$1,076

3-year totals

	3-year cumulative
Revenue	~\$12.1M
Net profit (55%)	~\$6.7M
Campuses deployed	60
Billable assets (EOY Y3)	~6,600
On-prem tags (EOY Y3)	~240,000

Part 5 — System impact @ 60 campuses

Tag & runtime load

Resource	Per campus	@ 60 campuses	Phase 1 limit	Status
On-prem tags (MVP Suite)	~4,000	~240,000	Edge (16 GB / 256 GB SSD)	Size appliance

Cloud rollup tags	~600	~36,000	70,912 default	OK — set MOOREVIEW_MAX_TAGS=65536
Full cloud mirror	4,000	240,000	70,912	FAIL ~campus 18
Site-agent MQTT	1	60	~2,000	OK
Cloud ingest (rollup)	~25 MB/mo	~1.5 GB/mo	—	Low vs wastewater fleet
Hot Mongo (7 d)	~17 MB	~1 GB	15 GB base	OK

Infrastructure opex @ 60 campuses

Line	Monthly	Annual	% of \$727K/mo renewal
SaaS 8 GB droplet	\$48	\$576	0.007%
MQTT + Mongo + archive (Phase 1)	~\$160	~\$1,920	0.02%
Cellular — 60 site agents (\$7 cost)	\$420	\$5,040	0.06%
Total cloud/cell	~\$628	~\$7,536	~0.09%

Cloud is not the constraint. Edge hardware (**60 × MVP Suite**), commissioning capacity, and **support labor** dominate — consistent with Infrastructure Projections: *“Size the appliance, not the droplet.”*

Ramp — system milestones (3 campuses / month equivalent)

EOY year	Campuses	Cloud tags (rollup)	Infra action
Y1	12	~7,200	Phase 1 4 GB OK
Y2	36	~21,600	SaaS → 8 GB · MAX_TAGS=65536
Y3	60	~36,000	Archive +50 GB · Mongo stays base

Edge fleet @ 60 campuses

Resource	Per campus	Fleet total
MVP Suite RAM	16 GB recommended	~960 GB
Local SSD (historian + cameras)	256 GB	~15.4 TB
On-prem tag database	~4,000	~240,000

Coexistence with wastewater on same Phase 1 stack

If one **mooreVIEW Cloud** hosts **ALF 60 + wastewater 500 IoT-Link**:

Load	ALF (60)	Wastewater (500)	Combined
------	----------	------------------	----------

MQTT connections	60	532	~ 592 OK
Cloud tags	~36,000	~7,000	~ 43,000 OK
Hot Mongo	~1 GB	~6.5 GB	~ 7.5 GB OK on 15 GB tier
SaaS RAM pressure	Low (rollup)	Moderate	Step 8 → 16 GB if WW PdM ingest heavy
Dominant opex	Support labor	Cellular ~\$1,250/mo	WW drives cell; ALF drives support

Recommendation: ALF + WW on one Phase 1 tenant is **technically feasible** with rollup sync; **monitor SaaS RAM** when combined hot Mongo exceeds **10 GB** or WW fleet adds high-rate lift PdM.

Part 6 — Go-to-market

Phase	Campuses	Focus
Y1	12	Reference campus · Purple Standard / FM partner · prove 55% margin on 2 pilots
Y2	36	Regional operator MSAs · \$110/asset enterprise schedule
Y3	60	National portfolio · single Parc tenant · optional per-campus org (model C)

Sales line: *Survey-ready every day — \$110 per monitored asset, not per software seat.*

Part 7 — Risks & mitigations

Risk	Mitigation
Full tag mirror to cloud	Enforce rollup site-agent sync (model B)
Support cost erodes 55% margin	Cap assets/campus in contract; tier L2 at 110 assets
Edge appliance undersized	16 GB / 256 GB minimum; heavy vision = 512 GB
Long install cycle	Partner FM crews; template assisted-living clone
Clinical software confusion	Facilities/MEP only — not eMAR / nurse call

Appendix — assumptions

Item	Value
Campuses	60 over 3 years (12 + 24 + 24)
Customer price	\$110 / billable asset / mo

Assets / campus (avg)	~ 110
Tags / campus (technical)	~ 4,000 on MVP Suite
Net profit target	55% of total revenue
OH	\$3/device/mo Y1 blend · 7% of revenue Y2+
Cloud sync	Rollup ~600 pens/campus
Phase 1 topology	NYC1 SaaS + MQTT + Archive + Mongo
List MSRP cross-check	Pricing Guide v2.4 standard campus \$12K + \$833/mo

Disclaimer: Directional business plan for enterprise ALF portfolio modeling. Not a financial forecast, quote, or SLA.
