mooreVIEW — Multifamily / Apartment Business Plan

Institutional MEP · small operator · 20 properties · ~1,500 assets/property · \$110/asset · 55% net profit · 2026

Document version: 1.0 · 2026-08-13

A company powered by The Purple Standard · purple-standard.com

Executive summary

mooreVIEW **Living Property** targets **small regional multifamily operators** (boutique PM companies, family REITs, **8–25 garden/mid-rise communities**) with **~1,500 billable monitored assets per property** (unit leak/HVAC zones, boiler/chiller plant, garage exhaust, laundry, pool, fire pump, common-area RTUs, domestic water) — **MVP Suite on-prem (~4,500 technical tags/property)** and **Phase 1 Cloud SaaS** for portfolio fleet view via **site-agent rollup sync**.

Metric	Year 1	Year 2	Year 3
New properties	4	8	8
Cumulative properties	4	12	20
Billable assets (EOY)	~6,000	~18,000	~30,000
Total revenue	~\$2.3M	~\$15.2M	~\$31.0M
Total cost (45%)	~\$1.0M	~\$6.8M	~\$14.0M
Net profit (55%)	~\$1.3M	~\$8.4M	~\$17.1M
End-of-year renewal ARR	~\$7.9M	~\$23.8M	~\$39.6M

Customer pricing: \$110 / monitored asset / month × ~1,500 assets → \$165,000 / property / month · \$165,000 one-time commissioning per property.

Target margin: 55% net profit (45% all-in cost: install COGS, cloud, 7% OH Y2+, support, sales, platform).

System impact @ 20 properties: ~90,000 on-prem tags · ~16,000 – 24,000 cloud rollup tags · Phase 1 OK on single stack with `MOOREVIEW_MAX_TAGS=65536` . **Do not** full-mirror 4,500 tags/property into one tenant.

Part 1 — Market & product

Scope

Layer	Role
-------	------

Edge (each property)	MVP Suite Heavy — ~4,500 tags, ~1,500 billable assets, cameras, 13 mo local historian
Cloud (portfolio)	SaaS :3100 — site agent, fleet map, rollup alarms (building/system — not every unit mirror)
Project	multifamily / Living Property .est (garden + mid-rise templates)

Asset vs tag

	Count / property	Purpose
Billable asset	~1,500	Contract unit (\$110/mo) — unit leak nodes, PTAC/heat-pump zones, walk-in/mailroom, boiler, garage CO, pool, laundry
Technical tag	~4,500	MVP Suite TagStore (~3 tags/asset — state, alarm, trend pen)
Cloud rollup pen	~800 – 1,200	Portfolio dashboard — building/plant rollups only

Buyer — small operator profile

Buyer	Scale
Regional PM / owner-operator	8 – 25 properties · 12K – 37K billable assets at full fleet
Boutique REIT / syndicate GP	Single-tenant portfolio Parc · model B rollup sync

Contrast: National multifamily (Greystar-class) is enterprise ALF-scale; this plan models **small operators** who still deploy **full-campus asset density** per community.

Part 2 — Pricing model (\$110 / asset × ~1,500)

Property default (planning)

Term	Value
Assets / property (avg)	~1,500
Rate	\$110 / asset / mo
Property recurring	\$165,000 / mo
Property one-time	\$165,000
Tags / property (technical)	~4,500 on MVP Suite

Property profile mix (20-property fleet)

Profile	Share	Units	Assets	Recurring/mo	One-time
---------	-------	-------	--------	--------------	----------

Garden (2–3 story)	35%	~180	~900	\$99,000	\$99,000
Mid-rise (4–8 story)	50%	~280	~1,500	\$165,000	\$165,000
High-rise / mixed-use	15%	~400+	~2,200	\$242,000	\$242,000
Fleet weighted avg	100%	~280	~1,500	~\$165,000	~\$165,000

Comparison to legacy spend

Model	Per property / mo	Notes
BMS + leak vendor + pool service (reactive)	\$8K – \$25K	Multiple vendors · no unified Parc
mooreVIEW (1,500 × \$110)	\$165,000	Full-property proactive MEP + CMMS + evidence

Positioning: Replaces **emergency truck rolls, water-damage deductibles, and idle HVAC truck visits** — priced as **asset monitoring**, not rent per door.

Part 3 — Cloud deployment & scaling path

Stage	Properties	Cloud rollup tags	Infrastructure
Phase 1 OK	1 – 20	~16,000 – 24,000	4 – 8 GB SaaS · 15 GB Mongo · MAX_TAGS=65536
Growth path	21 – 40	~34K – 48K	8 GB SaaS · Mongo 50 GB
Full mirror (avoid)	8+	>90,000	Off Phase 1 — per-property tenant

Recommended sync: **Model B** — rollup ~800 pens/property. **Model C** — **per-property tenant** if operator requires unit-level cloud visibility for investors.

Part 4 — Financial model (20 properties / 3 years)

Ramp

4 + 8 + 8 = 20 properties over 3 years · ~1,500 assets each · \$110/asset/mo.

Revenue

Metric	Year 1	Year 2	Year 3
New properties	4	8	8
Cumulative (EOY)	4	12	20
New assets (approx.)	~6,000	~12,000	~12,000
One-time (\$165K × new)	\$660K	\$1.32M	\$1.32M
Renewal (ramped property-months × \$165K)	\$1.65M	\$13.86M	\$29.70M
Total revenue	~\$2.3M	~\$15.2M	~\$31.0M
Renewal ARR (EOY run-rate)	~\$7.9M	~\$23.8M	~\$39.6M

Y1 renewal: 10 property-months (1+2+3+4) × \$165,000. Y2: 4 full-year + 8 ramped (84 property-months). Y3: 12 full-year + 8 ramped (180 property-months).

Cost structure (45% → 55% net profit)

Cost line	Y1	Y2	Y3	Y3 % rev
Install hardware COGS (~35% of one-time)	\$231K	\$462K	\$462K	1.5%
Install labor (~\$25K/property × new)	\$100K	\$200K	\$200K	0.6%
Cloud + cellular (Phase 1)	\$25K	\$75K	\$120K	0.4%
Overhead (7% of revenue)	\$161K	\$1.06M	\$2.17M	7.0%
Customer success & L2 (~11%)	\$253K	\$1.67M	\$3.41M	11.0%
Sales & commission (~8%)	\$184K	\$1.22M	\$2.48M	8.0%
Platform / R&D (~5%)	\$115K	\$760K	\$1.55M	5.0%
Warranty, spares, G&A (~5%)	\$131K	\$1.36M	~2.81M	~9.1%
Total cost	~\$1.0M	~\$6.8M	~\$14.0M	~45%
Net profit (55%)	~\$1.3M	~\$8.4M	~\$17.1M	~55%

Per-property unit economics (Y3 steady state)

	Per property / mo	Per property / yr
Revenue (1,500 × \$110)	\$165,000	\$1,980,000
Total cost (45%)	\$74,250	\$891,000
Net profit (55%)	\$90,750	\$1,089,000

3-year totals

	Cumulative
Revenue	~\$48.5M
Net profit (55%)	~\$26.7M
Properties	20
Billable assets deployed	~30,000
On-prem tags	~90,000

Part 5 — System impact @ 20 properties × ~1,500 assets

Load summary

Resource	Per property	@ 20 properties	Limit / action
Billable assets	~1,500	~30,000	Contract/pricing unit
On-prem tags (MVP Suite)	~4,500	~90,000	Heavy appliance 32 GB / 512 GB
Cloud rollup tags	~800 – 1,200	~16K – 24K	Phase 1 OK
Full cloud mirror	~4,500	~90,000	Not on Phase 1
Site-agent MQTT	1	20	OK on Phase 1 MQTT
Cloud ingest (rollup)	~80 – 150 MB/mo	~1.6 – 3 GB/mo	Mongo 15 GB OK
Hot Mongo (7 d)	~40 – 80 MB	~0.8 – 1.6 GB	OK

Edge fleet @ 20 properties (Heavy profile)

Resource	Per property	Fleet total
MVP Suite RAM	32 GB	~640 GB

Local SSD	512 GB	~10 TB
Commissioning touchpoints	~1,500 assets	~30,000

Cloud opex @ 20 properties (Phase 1)

Line	Monthly (Y3)	Annual	% of \$3.3M/mo renewal
SaaS 8 GB	~\$48	~\$576	0.001%
Mongo 15 – 50 GB	~\$75 – 200	~\$900 – 2.4K	0.01%
MQTT + archive	~\$97	~\$1,164	0.003%
Cellular — 20 site agents (\$7)	\$140	\$1,680	0.004%
Total cloud/cell	~\$360 – 485	~\$4.3 – 5.8K	~0.01%

Cloud remains <<1% of renewal — edge hardware, leak-matrix install, and L2 support dominate the 45% cost stack.

Part 6 — Go-to-market

Phase	Properties	Assets (cum.)	Focus
Y1	4	~6K	Pilot 1 garden + 1 mid-rise @ full 1,500 · prove 55% margin
Y2	12	~18K	Regional MSA · FM partner install · portfolio Parc
Y3	20	~30K	Reference operator · expand to second small PM logo

Sales line: 1,500 monitored assets per community — proactive MEP at **\$110/asset**, not per-unit rent.

Part 7 — Risks & mitigations

Risk	Mitigation
Operator expects \$/door pricing	Contract on monitored assets — leak, HVAC, plant only
Renter turnover vs asset count	Assets are infrastructure , not leaseholds
Water-damage ROI narrative	Bundle leak matrix + CMMS evidence for insurance/carrier
Appliance undersized	32 GB / 512 GB Heavy minimum @ 1,500 assets

Appendix — assumptions

Item	Value
Properties	20 over 3 years (4 + 8 + 8) — small operator
Assets / property	~1,500 (billable)
Tags / property	~4,500 (technical)
Customer price	\$110 / asset / mo
Property recurring	\$165,000 / mo
Net profit target	55%
OH	\$3/device/mo Y1 · 7% of revenue Y2+
Cloud sync	Rollup ~800 – 1,200 pens/property
Edge profile	MVP Suite Heavy 32 GB / 512 GB

Disclaimer: Directional model for small multifamily operators — not a forecast, quote, or SLA.
