mooreVIEW — Cloud Infrastructure Pricing Model

RAM, COGS, and subscription pricing guidance · 0–36 month plan

A company powered by The Purple Standard · purple-standard.com

Document version: 1.0 · 2026-07-28

Executive summary

This document translates the **vertical-shard cloud architecture** into **directional DigitalOcean COGS** and **subscription pricing guidance** for three planning periods: **0–12**, **12–24**, and **24–36 months**.

Key finding: Cloud infrastructure COGS is **\$0.05–0.13 per site per month** at scale — **under 1% of list subscription MRR**. Pricing should **not** be driven by tag count or Mongo droplets. Hold **\$18 / \$25** field list prices; use **fleet tiers** and **ALF campus bands** from the Subscription Sell Sheet.

Companion doc: `docs/CLOUD_VERTICAL_SHARDS.md` (architecture and shard plumbing).

1. Fleet ramp (end-of-period)

Linear ramp to **~54K sites / 5M cloud tags @ M36**. **M18** matches the detailed planning fleet (~4,550 sites, ~415K tags).

Metric	M12	M18	M24	M36
Lift / septic / WWTP	2,000	3,000	13,100	30,100
Pools	667	1,000	4,380	10,000
C-store / grocery	333	500	2,568	6,600
ALF campus	33	50	256	660
Total sites	3,033	4,550	21,304	54,360
Cloud tags	277K	415K	1.94M	5.0M

Assumptions: 5 min + exception reporting; ALF slim mirror (400 cloud tags/campus); pools lift-like I/O (85 tags/site).

2. Architecture snapshot by period

2.1 Period 1 — 0–12 months

Component	M0–M6	M6–M12
SaaS	1× 4 GB	LB + 2× 4 GB
Ingest	1× 16 GB (field)	1× 16 GB field + 1× 8 GB retail
MQTT	1× 4 GB	1× 4 GB
Mongo	entry tier	4 GB RAM / ~80 GB disk
Archive	—	128 GB block (from M6)

2.2 Period 2 — 12–24 months

Milestone	Ingest cells	Notes
M18 (~415K tags)	2 (field 32 GB + retail 16 GB)	Detailed planning fleet
M24 (~1.94M tags)	6 vertical cells	3× lift + pool + c-store + ALF

2.3 Period 3 — 24–36 months

Component	@ 5M tags
Ingest	11 cells (6 lift + 2 pool + 2 c-store + 1 ALF)
MQTT	2× 16 GB or EMQX HA
Mongo	32–64 GB RAM tier, 400–600 GB disk
Archive	1–2 TB
SaaS	2–3× 4 GB + LB

3. Monthly cloud COGS (DigitalOcean, directional)

Line item	M12	M18	M24	M36
SaaS + LB	\$60	\$60	\$60	\$84
Ingest (vertical shards)	\$144	\$288	\$912	\$1,632
MQTT	\$48	\$48	\$96	\$192
Managed Mongo	\$70	\$122	\$284	\$540

Archive storage	\$13	\$26	\$51	\$200
Egress / misc	\$20	\$30	\$75	\$150
Total COGS / mo	~\$355	~\$574	~\$1,478	~\$2,798

Period averages (annual budget)

Period	Avg sites	Avg COGS / mo	Annual cloud spend
0–12 mo	~1,500	~\$220	~\$2,600
12–24 mo	~12,500	~\$900	~\$10,800
24–36 mo	~38,000	~\$2,100	~\$25,200

Directional only — confirm in DO pricing calculator before customer quotes.

4. COGS per site

Period end	Sites	COGS / mo	COGS / site / mo
M12	3,033	\$355	\$0.12
M18	4,550	\$574	\$0.13
M24	21,304	\$1,478	\$0.07
M36	54,360	\$2,798	\$0.05

5. Fully loaded COGS (pricing floor)

Add-on	Per site / mo	Notes
Cellular (list pass-through)	\$3.00	Subscription Sell Sheet
Cloud platform (above)	\$0.05–0.13	Shrinks with scale
Ops / monitoring (~15% cloud)	~\$0.01–0.02	—
Support allocation	\$1.50–4.00	Tier by vertical
Loaded COGS — field site	~\$5–8 / mo	Lift, pool, c-store
Loaded COGS — ALF campus	~\$15–25 / mo	Slim cloud; edge carries bulk

6. Revenue vs COGS @ list prices

List prices from **MooreVIEW Subscription Sell Sheet v1.2**:

Vertical	List subscription
Home ATU, pool, HVAC	\$18 / mo
Business lift, ATU, pool, c-store, well	\$25 / mo
ALF small / standard / large	\$417 / \$833 / \$2,083 / mo
Cell data (optional)	+\$3 / mo

Estimated MRR @ list (end-of-period)

Period end	Est. MRR	Cloud COGS	COGS as % of MRR
M12	~\$100K / mo	\$355	0.4%
M18	~\$150K / mo	\$574	0.4%
M24	~\$696K / mo	\$1,478	0.2%
M36	~\$1.67M / mo	\$2,798	0.2%

Gross margin on cloud COGS alone: ~99%.
After \$5 loaded COGS on \$25 subscription: ~80% gross before field labor.

7. Pricing guidance by period

7.1 Field sites (lift, septic, ATU, pool, c-store)

Period	Sites	Recommendation
0–12 mo	0 → 3K	Hold list (\$18 / \$25). Max 10–15% discount for ≥50-site fleet LOI.
12–24 mo	3K → 21K	Hold list ; introduce fleet tiers (below).
24–36 mo	21K → 54K	Volume tiers; optional +\$2–5/mo PdM/ONNX lift premium.

7.2 Fleet discount tiers (subscription only)

Customer cumulative sites	Discount	Floor (com \$25 list)
1–49	0%	\$25.00
50–199	10%	\$22.50
200–999	15%	\$21.25

1,000+	20%	\$20.00
--------	-----	---------

At **20% off** (\$20) with ~\$5 loaded COGS → ~75% gross margin remains.

7.3 ALF campus

Tier	List / mo	Loaded COGS	Pricing floor
Small	\$417	~\$20	\$350
Standard	\$833	~\$25	\$700
Large	\$2,083	~\$35	\$1,750

Do not discount ALF on cloud grounds — appliance and commissioning dominate cost.

7.4 Multi-tenant platform fee (optional)

Period	Model
0–12 mo	\$500/mo platform min + per-site subscription
12–24 mo	\$1,500/mo + \$0.50/active device/mo (cap \$5K)
24–36 mo	\$5K/mo + \$0.25/device/mo or rev-share

8. Setup fees (one-time)

Vertical	List setup	Cloud onboarding share
Field (home)	\$1,500	< \$50
Field (business)	\$2,500	< \$50
ALF campus	\$8,000 – \$15,000	< \$200

Hold setup fees all three periods — hardware and labor drive cost, not cloud.

9. Period summary card

	0–12 months	12–24 months	24–36 months
End sites	~3,000	~21,000	~54,000
End cloud tags	~277K	~1.94M	~5M
Ingest shards	1 → 2	2 → 6	11

Monthly cloud COGS	~\$355	~\$574 → \$1,478	~\$2,798
COGS / site	~\$0.12	~\$0.07–0.13	~\$0.05
List MRR potential	~\$100K	~\$150K → \$696K	~\$1.67M
Pricing stance	Hold list	Fleet tiers	Volume + platform fee
Binding cost	Cell + install	+ shard ops	MQTT HA + Mongo tier

10. CFO one-liner

*Year 1 cloud spend ~\$2.6K · Year 2 ~\$11K · Year 3 ~\$25K — immaterial vs subscription revenue at list. Price for **cellular, support, and edge**; use cloud COGS only to validate fleet discounts stay above **~75% gross**.*
