mooreVIEW — Product Market Entry

Proactive operations. Portable everywhere. Priced for monitoring contracts.

A company powered by The Purple Standard · purple-standard.com

Document version: 1.4 · 2026-07-26

Executive summary — market entry thesis

mooreVIEW enters the market as a **field-service monitoring platform** — not plant-floor SCADA. We sell **proactive, portable** operations for distributed mechanical assets: lift stations, septic/ATU, wells, **residential and commercial pools, residential and commercial HVAC, convenience stores**, refrigeration, and institutional campuses (facilities/MEP only).

Pillar	mooreVIEW
Proactive	PdM detects degradation; CMMS schedules fix before failure — alarms are the last line
Portable	One .est project moves office → edge → cloud → next contractor
Priced for routes	Hardware + commissioning once · monthly renewal · no tag-count tax

One line: mooreVIEW turns distributed mechanical assets from breakdown businesses into condition-based, contracted monitoring businesses.

Parent company: [The Purple Standard](https://purple-standard.com) — mooreVIEW is the technology company in a portfolio of field-service operators (flagship: **ACE Septic & Waste**). Sister trades hold septic, electric, well, and on-site licenses; mooreVIEW provides fleet visibility, PdM, CMMS, and portable projects.

Part 1 — Product

At a glance

mooreVIEW is an integrated automation, condition monitoring, and maintenance platform:

- **Structured Text (ST) runtime** — edge logic on pumps, compressors, blowers, wells
- **Tag database & drivers** — Modbus, MQTT, serial, HTTP (incl. NextCentury leak cloud), **BACnet/IP** (edge), HAL
- **Integrated HMI** — no separate SCADA license stack
- **Historian & trends** — MongoDB-backed history; optional **7-day hot** → **zstd archive** for fleet deployments
- **MQTT Parc fleet hub** — multi-site contractor / utility / OEM visibility
- **Predictive maintenance (PdM)** — health index, RUL, failure forecast
- **Integrated CMMS** — PdM, alarm, and PM → work orders in one app
- **IP cameras & vision AI** — ONVIF, optional inference

- **Training (F2)** — IoT CBM + mooreVIEW labs M0–M15
- **Facility PQ** — EZ Meter DDS-RGB templates for campus mechanical-room power quality
- **Cellular Parc gateway** — LilyGO T-ETH-Elite + A7670 bridges Opta MQTT to cloud droplet

Deployments: MVP Suite (Windows/Linux appliance) · IoT-Link (edge/cellular) · Cloud SaaS (:3100) · MV Client (remote UI) — one codebase, one API, one `.est.zip` project format.

The reactive trap

What happens today	What it costs
Assets run until failure or complaint	Emergency dispatch, overtime, spoilage, overflow
Alarms = local dialers or siloed OEM apps	No fleet view, no history, no work order
“Preventive” = calendar guesswork	Labor spent whether the asset needs it or not
Every site = custom snowflake	Knowledge trapped; handoffs mean starting over

Legacy SCADA vendors optimize the **reactive loop**. mooreVIEW changes the **model**.

Proactive workflow

Edge sensing + historian

- PdM feature windows
- Failure forecast (warning / critical / failed)
- CMMS proactive PM work order (source: pdm)
- Technician completes planned route
- Service history → next forecast

Layer	Timing	Outcome
Predictive (PdM)	Days–weeks before failure	Proactive PM work order
Preventive (PM)	Calendar interval	Routine service
Reactive (alarm)	Out of limits	Urgent WO — last line , not the strategy

Marketplace verticals

#	Space	Proactive wedge	Bundled project
1	Lift stations	Level/pump trends before SSO	<code>duplex-lift-station</code>
2	Wastewater / ATU	Blower/UV/pump health; compliance route	Wastewater / ATS packs
3	Septic / ATS OEM	White-label panel + provider fleet	ATS.est

4	Wells & pumps	Dry-run/yield → scheduled pull	Well Guard
5	Refrigeration / convenience store	Walk-in/rack drift before product loss	Cold Chain / c-store pack
6	HVAC — residential	Band drift before occupant call	Comfort residential
7	HVAC — commercial	RTU runtime/amp anomalies; filter DP	Comfort commercial
8	Pool — residential	Filter/chemistry/backwash before green water	Pool residential
9	Pool — commercial	Pump health, chemistry, schedule compliance	Pool commercial
10	Institutional / ALF	Campus leaks, pool/kitchen/mechanical; survey evidence	assisted-living

Go-to-market beachhead: Lift stations + convenience store cold chain (high cost of being late) → pools + HVAC (contractor route attach) → septic OEM embed + institutional campuses.

Portable .est projects

One **.est.zip** archive holds program, tags, drivers, HMI, alarms, PdM context, CMMS data, cameras, and site plan. Legacy **.est.json** imports convert on **Import project file.... Open, save, deploy, hand off** — no silent re-commissioning.

Who buys

Buyer	Why mooreVIEW
Service contractors	Monitoring contracts + planned routes
Utilities / operators	Fleet Parc; fewer SSO events
OEM panel shops	Connected panel vs dialer-only skid
Asset owners	Vendor-independent continuity via .est

Proof of market entry

- Work orders created **before** customer complaint
 - Partners sell **monitoring agreements**, not only T&M breakdowns
 - Reference stories: **avoided** overflow, food loss, pump burn-up, pool failure, warm box, **survey finding** — not “faster response”
-

Part 2 — Pricing

Base model

One-time hardware + commissioning per asset + **monthly monitoring renewal**. Cell data billed separately when mooreVIEW-managed.

Rule: Price by **asset type**, not I/O tag count.

List price — one-time (hardware + commissioning)

Residential tier · Commercial tier (includes lift station and convenience store)

Asset type	One-time
ATU — residential	\$1,500
Pool — residential	\$1,500
HVAC — residential	\$1,500
ATU — commercial	\$2,500
Pool — commercial	\$2,500
HVAC — commercial	\$2,500
Convenience store	\$2,500
Lift station — duplex	\$2,500
Well & pump	\$2,500

Includes edge gateway, vertical `.est` template I/O, commissioning, HMI, alarms, initial Parc enrollment.

List price — monitoring renewal

Asset type	Renewal / mo	Annual
ATU — residential	\$18	\$216
Pool — residential	\$18	\$216
HVAC — residential	\$18	\$216
ATU — commercial	\$25	\$300
Pool — commercial	\$25	\$300
HVAC — commercial	\$25	\$300
Convenience store	\$25	\$300
Lift station — duplex	\$25	\$300

Well & pump	\$25	\$300
------------------------	-------------	--------------

Renewal includes software, Parc, historian, CMMS, PdM, updates. **PdM → proactive CMMS included** — not an upsell.

Cellular data

Line item	Rate
Cell data (mooreVIEW-managed SIM)	\$3 / mo (\$36 / yr)

No cell charge when customer provides WAN/Ethernet.

Year-1 totals (with cell)

Asset type	One-time	Renewal (12 mo)	Cell (12 mo)	Year-1 total
Residential tier (ATU, pool, HVAC)	\$1,500	\$216	\$36	\$1,752
Commercial tier (ATU, pool, HVAC, c-store, lift)	\$2,500	\$300	\$36	\$2,836

Year-2+ recurring (with cell): \$252/yr residential (\$21/mo) · \$336/yr commercial (\$28/mo).

Enterprise tier — institutional / ALF campus

Campus profile	One-time	Renewal / mo	Year-1 total
Small (1 building, ≤80 beds)	\$8,000	\$417	~\$13,000
Standard (2–3 buildings)	\$12,000	\$833	~\$22,000
Large / multi-system	\$15,000	\$2,083	~\$40,000

Facilities / MEP only — HVAC, kitchen cold, generator, DHW, leaks, optional pool/septic/well, portfolio Parc, CMMS SLA, compliance evidence. **Industry pricing study:** Pricing Guide v2.4.

Annual prepay (2 months free)

Tier	Annual prepay renewal	+ cell	Total recurring
Residential (ATU, pool, HVAC)	\$180	\$36	\$216
Commercial (ATU, pool, HVAC, c-store, lift)	\$250	\$36	\$286

Fleet volume discounts (renewal only)

Fleet size	Discount
10–49 sites	10% off monthly renewal

50–199 sites	15% off monthly renewal
200+ sites	Custom enterprise

Example — 20 duplex lift stations: \$50,000 one-time + **\$6,720/yr** recurring (renewal + cell).

Optional add-ons

Add-on	Directional
PdM premium	+\$5–\$10 / mo / site
Extended historian	+\$5–\$15 / mo / site
Camera + vision AI	+\$10–\$25 / mo / site
Cloud SaaS extra seats	+\$50–\$150 / user / mo

OEM channel

Model	Price
Panel embed	List one-time or OEM discount
Custom .est NRE	\$5,000 – \$25,000
Renewal resale	OEM bills customer; remits list or share

Sales quick reference

Buyer	Quote
Residential ATU, pool, or HVAC	\$1,500 + \$18/mo (+ \$3/mo cell)
Commercial ATU, pool, HVAC, or convenience store	\$2,500 + \$25/mo (+ \$3/mo cell)
Duplex lift station	\$2,500 + \$25/mo (+ \$3/mo cell)
Convenience store (cold chain + RTU)	Same commercial tier — walk-in, rack, HVAC in one .est

Part 3 — Competitive landscape

mooreVIEW vs legacy SCADA — positioning

Traditional platforms — **VTScada, Wonderware InTouch, CIMPLICITY, Ignition, FactoryTalk View SE** — target **in-plant** supervisory control: tag/seat licensing, integrator projects, **reactive** alarms.

mooreVIEW targets **dispersed field assets** and **monitoring-contract economics**.

Competitor pricing at a glance (USD list / MSRP)

Platform	Model	Typical single-site	Recurring
mooreVIEW	Install + monthly renewal	\$1,752 – \$2,836 yr 1	\$252 – \$336/yr + cell
VTScada	Per PC + I/O tags	\$3,395+ runtime (1K I/O)	~15% SupportPlus
Wonderware InTouch	Perpetual / Flex	\$1,850 – \$20,600	~20% support / tokens
CIMPLICITY	Per I/O points	\$721 – \$16,307+	Support plans
Ignition	Per gateway	~\$14,700+ SCADA stack	16–24% support
FactoryTalk View SE	Quote / subscription	~\$10K – \$25K+	Subscription or maintenance

Year-1 TCO — one duplex lift station

Solution	Year-1	PdM → CMMS
Autodialer	~\$600 – \$1,200	○
mooreVIEW (+ cell)	~\$2,836	●
VTScada (1K + add-ons)	~\$7K – \$12K	○
Wonderware Unlimited Std	~\$15K+	○
Ignition (Platform + suite)	~\$17K – \$20K+	○
FactoryTalk SE (quoted)	~\$10K – \$25K+	○

Competitor figures exclude integrator labor and hardware unless noted.

Feature comparison matrix

Legend: ● native · 🕒 module/integrator · ○ not core · ★ mooreVIEW differentiator

Capability	mooreVIEW	VTScada	Wonderware	CIMPLICITY	Ignition	FactoryTalk
Primary fit	Field-service fleets	Utilities/water	Process/plant	High-speed plant	Flexible SCADA/IIoT	Rockwell plants
Licensing	Install + renewal	Per PC + tags	Edition / Flex	Per points	Per gateway	Bundle / quote
HMI	●	●	●	●	●	●
Edge ST logic	★ ●	🕒	🕒	🕒	🕒	🕒 Logix
Historian	●	●	🕒	🕒	🕒	🕒

MQTT fleet (Parc)	★ ●	●	●	●	● \$	●
PdM + RUL	★ ●	○	○	○	○	○
Integrated CMMS	★ ●	○	○	○	○	○
Portable .est	★ ●	●	●	●	●	●

Use-case readiness — mooreVIEW verticals vs competitors

● strong · ● integrator/custom · ○ poor fit

Use case	mooreVIEW	VTScada	Wonderware	CIMPLICITY	Ignition	FactoryTalk
Lift stations	● ★	●	●	●	●	○
ATU / wastewater	● ★	●	●	●	●	○
Septic OEM embed	● ★	○	○	○	●	○
Wells & pumps	● ★	●	○	○	●	○
Convenience store (cold + HVAC)	● ★	○	● plant	● plant	●	○
Refrigeration / cold chain	● ★	●	● plant	● plant	● plant	●
HVAC — residential	● ★	○	●	●	●	○
HVAC — commercial	● ★	○	●	●	●	○
Pool — residential	● ★	○	●	○	●	○
Pool — commercial	● ★	●	●	○	●	○
Institutional / ALF campus	● ★	○	●	○	●	○
Multi-site contractor fleet	● ★	●	●	●	●	●
Proactive PdM → CMMS	● ★	○	○	○	○	○

Closest competitor overall: Ignition (adaptable, unlimited tags) — every vertical is a custom SI project without PdM/CMMS/portable pricing.

Closest by vertical: **VTScada** for lift/water utility; **Wonderware/CIMPLICITY** for in-plant cold chain; **FactoryTalk** rarely for mooreVIEW use cases.

Where mooreVIEW wins (sales answers)

Question	Legacy SCADA	mooreVIEW
Cost per site (pool, HVAC, c-store)?	Tag bands + integrator	\$1,500–\$2,500 + \$18–\$25/mo + \$3/mo cell
Fix before overflow / warm box / green pool?	Alarm after failure	PdM → proactive PM WO
Who creates the WO?	Phone dispatch	Integrated /cmms
Hand off to new contractor?	Re-engineer	Portable .est
Need integrator every site?	Usually	Vertical template + F2 training

Where legacy SCADA still leads

Requirement	Prefer
Large in-plant DCS / control room	Wonderware, CIMPLICITY, FactoryTalk
Unlimited tags, SQL-centric IT (one plant)	Ignition
20-year municipal utility integrator SCADA	VTScada
All-Rockwell Logix standard	FactoryTalk
Refinery / automotive high-channel SCADA	CIMPLICITY, Wonderware

mooreVIEW **complements** — it modernizes the long tail of distributed assets that cannot justify traditional SCADA economics.

Part 4 — Market revenue potential

Directional planning estimates — not financial forecasts. Based on list MSRP (v2.1), marketplace site targets, and US SAM wedges from vertical business plans.

Revenue per site (list pricing)

Tier	Assets	Year-1 (install + renewal + cell)	Steady-state recurring / yr
Residential	ATU, pool, HVAC	\$1,752	\$252
Commercial	ATU, pool, HVAC, c-store, lift	\$2,836	\$336

Blended rule of thumb: ~\$2,200 average year-1 per monitored site · ~\$300/yr recurring at maturity.

Institutional / ALF campus (multi-building): **\$5,000 – \$25,000 / yr** enterprise — priced above single-site commercial tier when bundling pool, kitchen, mechanical, and leak fleet on one campus **.est** .

Addressable market (United States, directional)

Vertical	Market indicator	Serviceable wedge (mooreVIEW)	5-year ARR potential
Lift stations & wastewater	~\$2.5B/yr US monitoring/control	~ \$400M/yr sites without full SCADA	\$15 – 25M recurring (wastewater plan)
Septic / ATU	Millions of ATS/ATU systems; compliance-driven	Licensed providers + OEM embed	\$5 – 12M recurring
Pools — residential	~10M US pools; service-contract attach	Contractor/OEM monitoring routes	\$3 – 8M recurring
Pools — commercial	Hotels, HOAs, aquatic centers	Proactive before guest/health event	\$2 – 6M recurring
HVAC — residential	Huge installed base; thermostat clouds	HVAC contractor PM agreement attach	\$5 – 15M recurring
HVAC — commercial	Light commercial RTU portfolios	Multi-site property managers	\$8 – 20M recurring
Convenience stores	~150,000 US c-stores	Cold chain + RTU; product-loss avoidance	\$10 – 30M recurring
Refrigeration / cold chain	Grocery, restaurant, food service	Overlaps c-store; contractor Parc	(included in c-store/HVAC-R)
Wells & pumps	Rural/ag/commercial wells	Installer fleet monitoring	\$2 – 5M recurring
Institutional / ALF	Thousands of campuses	Facilities/MEP only; BMS coexist	\$3 – 10M recurring

Portfolio 5-year ARR ceiling (all verticals): \$50 – 120M recurring at scale — dominated by **convenience retail**, **HVAC commercial**, and **wastewater** if fleet attach succeeds.

Purple Standard channel: Sister operators (ACE Septic & Waste and portfolio companies) provide **reference fleet**, **install capacity**, and **first 100–500 sites** without cold national sales — accelerating year 1–2 revenue vs standalone SaaS launch.

12-month launch model (directional)

Site targets for market entry year 1 — assumes Purple Standard + contractor channel ramp.

Vertical	Tier	Y1 site target	Y1 revenue (list)	Y1 recurring ARR added
----------	------	----------------	-------------------	------------------------

Lift station — duplex	Commercial	20	\$56,720	\$6,720
ATU — residential	Residential	50	\$87,600	\$12,600
ATU — commercial	Commercial	25	\$70,900	\$8,400
Pool — residential	Residential	30	\$52,560	\$7,560
Pool — commercial	Commercial	15	\$42,540	\$5,040
HVAC — residential	Residential	40	\$70,080	\$10,080
HVAC — commercial	Commercial	30	\$85,080	\$10,080
Convenience store	Commercial	10	\$28,360	\$3,360
Wells & pumps	Commercial	15	\$42,540	\$5,040
ALF / campus (enterprise)	Enterprise	2	\$30,000	\$30,000
Total		237 sites	~\$566,380	~\$98,880 ARR

Year-1 total revenue (directional): ~\$550K – \$600K — aligns with wastewater vertical financial plan; mix shifts toward pools, HVAC, and c-store vs lift/ATU-only.

End of year 1 installed base: 237-monitored sites — ~~~\$99K~~^{**} annual recurring run-rate entering year 2 (before renewals from earlier installs in-year).

3-year portfolio revenue model (directional)

Metric	Year 1	Year 2	Year 3
New sites installed	237	450	800
Cumulative monitored sites	237	687	1,487
Recurring ARR (end of year)	~\$99K	~\$320K	~\$780K
One-time (hardware + commissioning)	~\$470K	~\$900K	~\$1.6M
Total revenue (directional)	~\$570K	~\$1.5M	~\$3.5M

Year 2–3 assume 10–15% fleet renewal discounts on larger operators; institutional campuses at enterprise ACV pull totals upward.

Wastewater-only benchmark (from vertical plan): Year 1 **\$550K** · Year 2 **\$1.74M** · Year 3 **\$3.9M** — full portfolio model reaches similar year-3 scale with **broader vertical mix** and **lower per-site recurring** than legacy SaaS bands (\$1.5K–\$6K/station), compensated by **higher site volume** at accessible price points.

Unit economics (targets at scale)

Metric	Target
Software / renewal gross margin	75 – 85%
Hardware + commissioning margin	35 – 45%
Blended year-1 payback on install COGS	Under 14 months
Net revenue retention (fleet operators)	> 110%
Logo churn (annual)	< 5%
Revenue per installed site (steady state)	~\$300/yr recurring + replacement hardware cycle every 7–10 yr

LTV sketch (commercial tier, 7-year life): \$2,500 install + (\$336 × 7) ≈ **\$4,850** gross · **LTV:CAC target > 3:1** on contractor-led installs.

Revenue by sales channel

Channel	Revenue mix (mature)	mooreVIEW advantage
Purple Standard sister operators	25 – 35% early; 10 – 15% at scale	Built-in fleet, brand, install crews
Contractor monitoring contracts	40 – 50%	Attach on PM renewals; Parc fleet
OEM / panel embed	15 – 25%	One-time + per-panel renewal resale
Utility / municipal	5 – 15%	Longer cycle; higher logo value
Institutional / ALF enterprise	5 – 10%	High ACV; reference for FM market

Part 5 — Market entry summary

	Industry default	mooreVIEW market entry
Problem	Reactive breakdown loop	Proactive monitoring contracts
Buyer	Plant IT / integrator	Field-service contractor, OEM, operator
Pricing	Tag / seat / gateway	\$1,500–\$2,500 once + \$18–\$25/mo
Differentiator	Alarms	PdM → CMMS + .est + Parc
vs dialer	—	~5× recurring, 10× capability
vs SCADA	—	~3–10× lower year-1 on typical field site
Competition	Optimize reactive loop	Change the model

Year-1 revenue target	—	~\$550K – \$600K (~237 sites)
Year-3 revenue target	—	~\$3.5M (~1,500 cumulative sites)
5-year ARR ceiling (portfolio)	—	\$50 – \$120M recurring at national scale

Positioning line: *Less than one emergency truck roll per year. None of the SCADA integrator quote.*
