mooreVIEW Watch Plans — Simple Sell Sheet

We watch your equipment. You fix small problems before big ones.

A company powered by The Purple Standard · purple-standard.com

Document version: 1.0 · 2026-07-26

What is a Watch Plan?

A **Watch Plan** is a monthly subscription. mooreVIEW watches your site all day and all night.

We send alerts when something starts to go wrong. Your team fixes it on a **planned visit** — not on an emergency call.

Old way: Wait until it breaks. Then pay a lot. Then wait in line.

mooreVIEW way: See trouble early. Plan the fix. Save money and stress.

Every Watch Plan includes

You get	What it means
24/7 watching	Sensors and software never sleep
Alerts	Text, email, or app when something drifts
Work orders	A to-do list for your crew — auto-created
History & trends	See what happened last week or last year
Updates	New features and fixes — no extra charge

Optional: Cell data for remote sites — **\$3 / month** per site.

How to buy

- 1. Setup once** — We install sensors and turn on mooreVIEW. *(One-time fee — see pricing below.)*
- 2. Watch every month** — Your subscription keeps watching and alerting.
- 3. Fix on your schedule** — Your team or your partner (like WTR-Doctor or ACE Septic) does the work.

All ten product spaces

1. Lift stations

What we watch: Wet-well level, pump run time, pump starts, power backup.

Why it helps: Fix a pump **before** sewage overflows into the street.

	Price
Setup (once)	\$2,500
Watch Plan	\$25 / month

2. Wastewater & ATU (advanced treatment)

What we watch: Blowers, UV lights, pumps, high-water alarms.

Why it helps: Stay in compliance **before** odor, backup, or a failed inspection.

	Residential	Commercial
Setup (once)	\$1,500	\$2,500
Watch Plan	\$18 / month	\$25 / month

3. Septic — panel makers & service companies

What we watch: Same ATS signals — built into the control panel or added later.

Why it helps: Service routes run on **need**, not guesswork. OEMs ship smart panels today.

	Price
Setup	Per panel (ask for quote)
Watch Plan	Provider fleet plan (ask for quote)

4. Wells & pumps

What we watch: Pressure, pump amps, tank level, dry-run risk.

Why it helps: Pull the pump on a **planned day** — not after it burns up.

	Price
Setup (once)	\$2,500

Watch Plan	\$25 / month
------------	---------------------

5. Convenience stores & cold rooms

What we watch: Walk-in coolers, rack refrigeration, store HVAC, door alarms.

Why it helps: Catch a warm box **before** food spoils.

	Price
Setup (once)	\$2,500
Watch Plan	\$25 / month

6. Home air conditioning (HVAC)

What we watch: Room temps, supply/return air, filter and runtime trends.

Why it helps: Tune the system **before** the family says “It’s too hot.”

	Price
Setup (once)	\$1,500
Watch Plan	\$18 / month

7. Business air conditioning (HVAC)

What we watch: Rooftop units, stages, amps, filter pressure across many sites.

Why it helps: Fix RTUs **before** staff or guests walk into a hot building.

	Price
Setup (once)	\$2,500
Watch Plan	\$25 / month

8. Home pools — with WTR-Doctor

What we watch: Filter pump health, backwash schedule, **water quality sensors** (chlorine, pH, ORP, and more).

Why it helps: WTR-Doctor already services your pool. mooreVIEW adds **eyes in the water** between visits — so chemistry and equipment stay right **before** the water turns green or the pump dies.

	Price
--	-------

Setup (once)	\$1,500
Watch Plan	\$18 / month

Best together: WTR-Doctor visits + mooreVIEW Watch Plan = planned pool care, not pool emergencies.

9. Commercial pools — with WTR-Doctor

What we watch: Multi-pump systems, chemistry compliance, turnover schedule, **live water quality** at hotels, HOAs, schools, and aquatic centers.

Why it helps: Health-department rules and guest safety need proof. mooreVIEW logs the data. WTR-Doctor acts on it **before** a crisis event.

	Price
Setup (once)	\$2,500
Watch Plan	\$25 / month

10. Assisted living & campus buildings

What we watch: Comfort in resident rooms, kitchen cold storage, generators, hot water, leaks, pool rooms, and more — **one campus picture**.

Why it helps: Fix MEP problems **before** survey week or a resident complaint.

Campus size	Setup (once)	Watch Plan
Small (1 building)	\$8,000	\$417 / month
Standard (2–3 buildings)	\$12,000	\$833 / month
Large (4+ buildings)	\$15,000	\$2,083 / month

Facilities and mechanical systems only — not clinical or nurse-call software.

Quick price chart

Space	Setup once	Watch Plan / month
Home ATU, pool, or HVAC	\$1,500	\$18
Business ATU, pool, HVAC, c-store, lift, or well	\$2,500	\$25
Campus (assisted living)	\$8,000 – \$15,000	\$417 – \$2,083

Cell data (if needed)	—	+\$3
-----------------------	---	------

Year 1 example (home pool + WTR-Doctor + cell): \$1,500 setup + \$216 watching + \$36 cell = **about \$1,752.**

Year 2 and after: Just the Watch Plan (+ cell if used) — **about \$252 / year** for a home site.

Why subscribe?

Without a Watch Plan	With a Watch Plan
You find out when it’s already bad	You find out while it’s still small
Emergency fees and overtime	Planned routes and normal hours
No history — just guesses	Trends and proof for owners and regulators
Each site is a mystery	Your whole fleet on one dashboard

Who sells Watch Plans?

Partner	Role
mooreVIEW	Software, sensors, alerts, work orders
WTR-Doctor	Pool and water field service (<i>pool spaces</i>)
ACE Septic & Waste	Septic, lift, and wastewater field service
The Purple Standard	One family of companies — one pledge: clear talk, real tech, pro service

Three sentences to use on a call

1. “We watch your equipment 24/7 so you fix things before they break.”
2. “Setup is once; the Watch Plan is a low monthly fee that includes alerts, history, and work orders.”
3. “For pools, add water quality sensors to your WTR-Doctor service — we see the water between visits.”

Get started

Contact **The Purple Standard / mooreVIEW sales** · purple-standard.com

Ask for a Watch Plan quote for your site type. We will match the right sensor pack and subscription tier.
